Dear Sir or Madam

WE WOULD LIKE TO PRESENT YOU THE 29TH wholesale price list of plants produced in our Nursery. This year's price list includes over 300 plants offered by our company for the first time. Many of them are presented for the first time on the Polish nursery market.

As every year we try to extend our assortment. This time we recommend to pay special attention to a wide range of peonies (*Paeonia*), flowering dogwoods (*Cornus florida*) and koussa dogwoods (*Cornus kousa*).

We have also started a new web site of our Nursery szmit.pl. Previously available information has been enriched with new interesting texts and supplemented with numerous photographs. Linking of plants available in our offer with specifications available on our site EncyklopediaDrzew.pl seems to be very convenient. Enthusiasts of plants will be for sure interested in *Gallery* and *Our varieties* section. Starting from this year we are also available on Facebook: fb.com/SzkolkaSzmit.

We are pleased to inform you that during the last year's *Green is Life* exhibition, *Corylus avellana* PURPLE UMBRELLA 'JM 251'^{PBR} proposed by our Nursery was appreciated and

awarded a brown medal in the Plant Novelty Competition. At the same time, our stand as in the previous years, was granted the *Golden Lauren* award in the most attractive arrangement contest. We are proud of the fact that *Corylus avellana* PURPLE UMBRELLA was appreciated also during the Moscow exhibition, where it was awarded a gold medal.

We hope that in this year's catalogue you will find plenty of interesting positions and that you will be satisfied with the quality of plants offered by us. We encourage you to visit our Nursery and the display garden, as well as szmit.pl and EncyklopediaDrzew.pl web pages, and to follow our Facebook profile.

Уважаемые господа!

ПЕРЕДАЕМ в ВАШИ РУКИ XXXI ОПТОВЫЙ прейскурант растений, производимых нашим Питомником. В этом году Вы найдете в нем свыше 300 растений, предлагаемых нашей фирмой впервые. Многие из них дебютируют на рынке растений, выращиваемых отечественными питомниками.

Как и в предыдущие годы, мы стараемся расширять наш ассортимент. На этот раз рекомендуем уделить особое внимание широкому предложению разных сортов пионов (*Paeonia*), дерна цветущего (*Cornus florida*) и Коуза (*Cornus kousa*).

Мы тоже создали новый сайт нашего Питомника *szmit.pl*. Он обогащен новыми, интересными текстами и дополнен многочисленными фотографиями. Соединение наименований из прейскуранта с описаниями растений на нашей витрине *EncyklopediaDrzew.pl* облегчит пользователю более подробное ознакомление с растениями. Любителей растений несомненно заинтересует также *Галерея* и отдел *Наши сорта*. Начиная с этого года мы имеем профиль *Szkółka Szmit* на Facebook: *fb.com/SzkolkaSzmit*.

Нам приятно сообщить Вам, что на прошлогодней выставке *Zieleń to Życie* лещина обыкновенная (*Corylus avellana* PURPLE

UMBRELLA 'JM 251'^{PBR}), заявленная нашим Питомником, встретила с высокой оценкой и на конкурсе растительных новинок была награждена бронзовой медалью. Одновременно наш стенд, как и в предыдущие годы, получил *Złoty Wawrzyn* (*Золотой Лавр*) за самое интересное оформление. Мы очень гордимся тем, что лещина PURPLE UMBRELLA получила очень высокую оценку также на московской выставке *Flowers Expo* и была удостоена там золотой медали.

Мы надеемся, что и в каталоге на текущий сезон Вы найдете для себя много интересных растений и останетесь довольны качеством предлагаемого нами материала. Приглашаем Вас посетить наш Питомник, показательный сад, а также наши сайты *szmit.pl* и *EncyklopediaDrzew.pl*. Не забывайте и о нашем профиле на Facebook.

Og Garden

By the nursery one can find a show garden with a unique collection of over 6000 species and varieties of woody plants and perennials suitable for cultivation in our climate zone. For that reason our nursery is visited by many pupils, students, professionals and plant enthusiasts, both those living in Poland and abroad.

При питомнике имеется сад-образец с уникальной коллекцией свыше 6000 видов и сортов деревянистых растений и многолетников, подходящих для выращивания в нашей климатической зоне. Поэтому наш питомник посещается многими учениками, студентами, лицами, чья профессиональная деятельность связана с деревьями, а также любителями растений, как из Польши, так и из-за рубежа.
