Sambucus nigra LACED UP 'SNR1292' PBR

Dear Sir or Madam,

WE PRESENT YOU WITH A **WHOLESALE PRICE LIST No. XL** for plants produced at our Nursery. This year, the number XL appears to have a double meaning. On the one hand, it marks the fortieth time that we publish the price list. On the other hand, it could be interpreted as referring to size. Which is also true! Indeed, the price list includes a remarkably broad plant range – more than 3000 species and varieties under almost **4500 product items!** Therefore, it would be no exaggeration to call it an **XL-sized price list**. Inside, you will find over **200 new items** – plants proven to succeed in gardens and on terraces.

The most important of this year's new items is *Hydrangea paniculata* **GROUNDBREAKER BLUSH 'LC NO21'**^{PBR}. It is the world's first typically **ground cover (!) paniced hydrangea**. It grows up to 30–40 cm high. Its flowers gradually change color from white to intense pink-red. Our Nursery has joined the elite ranks of producers of this hydrangea variety in Europe. It is worth adding that this has been among the most meaningful “introductions” to the global nursery market in the recent years.

The catalogue also includes a wide assortment of **Japanese cherries**, including plenty of its rare historical varieties. It also includes a great deal of **interesting varieties of Hosta**. For the first time, we have introduced **fruit bearing varieties** of *Asimina triloba* to our offer.

We are pleased to share with you our last year's success. We were awarded a silver medal for *Sam-bucus nigra* **LACED UP 'SNR1292'**^{PBR} in the Plant

Novelties Contest at “Green is Life” exhibition. This is the first variety of the species with purple, indented leaves and columnar habit. Because of its very narrow habit, it is ideal for balconies or terraces.

We believe that many of you will be interested in the announcement of our new book. The book entitled “**Ozdobne Krzewy i Drzewa Liściaste**” (B.A. Szmit, B.J. Szmit, M. Mynett) will be published by Multico publishing house still this autumn.

This season, we are planning to take part in the following exhibitions:

Cienītās dāmas un godātie kungi!

MUMS IR PRIEKS IEPAZĪSTINĀT JŪS AR mūsu stādaudzētavas augu "XL" vairumtirdzniecības cenu sarakstu. Šogad apzīmējumam "XL" ir divējāda nozīme. No vienas puses, tas ir skaitlis, kas norāda, ka mūsu katalogs tiek publicēts jau 40. reizi. No otras puses, "XL" var lasīt kā izmēra apzīmējumu. Un tā arī ir taisnība! Tajā ir ietverts ārkārtīgi plašs augu klāsts – vairāk nekā 3000 sugu un šķirņu gandrīz 4500 produktu linijās! Nebūtu pārspīlēti teikt, ka šis ir **XL izmēra cenu saraksts**. Šeit atradīsiet vairāk nekā 200 jaunumu – augus, kas ir pierādījuši savu piemērotību izmantošanai dārzos un terasēs.

Šogad viens no svarīgākajiem jaunumiem ir *Hydrangea paniculata* **GROUNDBREAKER BLUSH** 'LC NO21'^{PBR}, kas ir pasaulē pirmā zemesdzes (!) skarainā hortenzija. Tā izaug līdz 30–40 cm augstumam un ziedu krāsa pakāpeniski mainās no baltas līdz intensīvi rozā-sarkanai. Mūsu stādaudzētava ir pievienojusies šīs hortenzijas ražotāju elitārajai grupai Eiropā. Ir vērts atzīmēt, ka šī ir viena no svarīgākajām introdukcijām pasaules stādaudzētavu tirgū pēdējos gados.

Katalogā ir iekļauta arī plaša japāņu ķiršu izvēle, tostarp daudzas retas vēsturiskas šķirnes. Jūs atradīsiet arī **daudzas interesantas hostu** (*Hosta*) šķirnes. Pirmo reizi piedāvājam arī veģetatīvi pavairotas, ražīgas *Asimina triloba* šķirnes.

Ar prieku ziņojam par pagājušā gada panākumiem. Izstādē "Green is Life" mēs ieguvām sudraba medaļu

augu jaunumu konkursā par mūsu melnā plūškoka šķirni – *Sambucus nigra* **LACED UP** 'SNR1292'^{PBR} – pirmā šīs sugas šķirne ar purpursarkanām, šķeltām lapām un kolonveida formu. Pateicoties šaurajai formai, to īpaši ieteicams stādīt podos uz balkoniem vai terasēm.

Jūs noteikti varētu ieinteresēt mūsu jaunās grāmatas "**Ozdobne Krzewy i Drzewa Liściaste**" (B.A. Szmit, B.J. Szmit, M. Mynett) izdošana. Tā tiks laista klajā šoruden Multico izdevniecībā.

Šajā sezonā mēs gatavojam standus sekojošās izstādēs:

📍 **Green is Life**, Varšava, 2025. gada 4.–6. septembris

📍 **Gardenia**, Poznaņa, 2025. gada 15.–17. oktobris

📍 **Zielony ShowRoom**, Konstantinova Ludzka, 2025. gada 4.–5. novembris

📍 **IPM Essen**, Esene, Vācija, 2026. gada 27.–30. janvāris.

Уважаемые господа!

Представляем Вам XL оптовый прейскурант растений, производимых в нашем Питомнике. В этом году номер „XL” кажется иметь двойное значение. С одной стороны это информация о том, что это наш сороковой прейскурант. С другой же „XL” можно рассматривать как определение размера. И это верно, так как в нем содержится чрезвычайно широкий ассортимент - свыше 3000 видов и сортов растений, представленных в настоящем издании почти 4500 позициями. Поэтому можно без преувеличения сказать, что это прейскурант в **размере XL**. Вы найдете в нем свыше 200 новинок – растений, оправдавшихся для использования в садах и на террасах.

Важнейшей из новинок этого года является *Hydrangea paniculata* **GROUNDBREAKER BLUSH** 'LC NO21'^{PBR}. Это первая в мире типично почвопокровная (!) гортензия метельчатая, достигающая до 30–40 см в высоту. Ее цветки постепенно меняют окраску от белой до интенсивно розово-красной. Наш Питомник вошел в элитарный круг производителей гортензий в Европе. Стоит здесь добавить, что это одна из важнейших „интродукций” последних лет на питомниководческом рынке в мире.

В настоящем каталоге-прейскуранте имеется очень широкий ассортимент вишни японской, в том числе много ее очень редких исторических сортов. Можно в нем найти тоже много интересных сортов хосты (*hosta*). Впервые в нашем предложении оказались тоже размноженные вегетативно плодовые сорта азимины (*Asiminetriloba*).

Нам также очень приятно похвастаться прошлогодним успехом нашего Питомника. На выстав-

ке „Zieleń to Życie” в Конкурсе Растительных Новинок мы завоевали серебряную медаль за сорт бузины черной – *Sambucus nigra* **LACED UP** 'SNR1292'^{PBR}. Это первый сорт данного вида с пурпурными, глубококорассечёнными листьями, отличающийся чрезвычайно узкой колонновидной формой, благодаря которой он особенно рекомендуется для выращивания в кадках на балконах и террасах.

Несомненно многих из наших Клиентов интересует информация о новой книге наших авторов (B.A. Szmit, B.J. Szmit, M. Mynett) „Ozdobne Krzewy i Drzewa Liściaste”, которая выйдет уже этой осенью в издательстве Multico.

В текущем сезоне наш Питомник будет участвовать в следующих выставках:

- ☞ Zieleń to Życie, Варшава, 4–6. сентября 2025
- ☞ Gardenia, Познань, 15–17. октября 2025
- ☞ Zielony ShowRoom, Константинув-Лудзки, 4–5. ноября 2025
- ☞ IPM Essen, Эссен, Германия, 27–30. января 2026.

Мы тоже присутствуем в Интернете:

Приглашаем Вас посетить наш Питомник, а заодно и наш образцовый сад. Согласно сложившейся традиции также в этом году желаем Вам успешного сезона в саду и огороде. Не надо бояться новых насаждений, даже если они в размере XL!
