NURSERY

Hydrangea paniculata GROUNDBREAKER BLUSH 'LC NO21' PBR

Dear Sir or Madam,

WE ARE PLEASED TO PRESENT YOU THE 41ST **wholesale price list** of plants produced in our Nursery. We have been publishing this price list for years, consistently striving to ensure that the assortment presented therein is not only broad, but also intriguing and diverse. This year, you will find therein over 200 novelties - both plants intended for gardens and those perfectly suited for terraces, balconies, and public green spaces.

One of the most crucial novelties of the last year was *Hydrangea paniculata* GROUNDBREAKER BLUSH 'LC NO21' ^{PBR}. This world's first truly ground-covering hydrangea was very well received on the market and, during the 'Green is Life' exhibition in 2025, it was granted a bronze medal in the Plant Novelties Competition as well as the Journalists' Distinction Award.

This season, our offer is expanding with two more varieties from the series GROUNDBREAKER: *Hydrangea paniculata* GROUNDBREAKER RUBY 'LC NO27' ^{PBR} and *Hydrangea paniculata* GROUNDBREAKER GREENY 'LC NO24' ^{PBR}. Both are characterized by very compact growth and perform excellently as ground-covering plants. They are particularly useful in public green-space plantings, but can also be successfully grown in containers placed on balconies and terraces.

Another interesting novelty is *Salix candida* ICEBERG ALLEY 'Jefberg' ^{PBR} — an attractive ground-covering plant distinguished by its silvery-gray foliage and decorative catkins. Its narrow, downy leaves give it a cool, almost icy tone that contrasts beautifully with greenery and darker shrubs in flower beds. In spring, even before the leaves are

fully developed, silvery catkins with red stamens appear on the shoots, eagerly visited by pollinating insects.

Attention shall also be paid to *Cercis griffithii* BLUE LAGOON 'RAFMAR 1' ^{PBR}. Its young shoots have a dark red coloration that contrasts distinctly with the cool, silvery tone of its heart-shaped leaves. This original color combination makes the plant a striking accent in garden compositions.

In the price list, you will also find many other new and interesting species and varieties. We hope that this year's offer will serve as a source of inspiration and allow you to enrich your plantings with valuable, striking plants that have so far been rarely seen in nursery production.

This season, we are preparing stands at the following exhibitions

📍 **Zieleń to Życie** [Green is Life], Warsaw,

3–5 September 2026

📍 **Gardenia**, Poznań, 6–8 October 2026

📍 **Zielony ShowRoom**, Konstancin-Jeziorna Łódzki,

Cienītās dāmas un godātie kungi!

ŠEIT IR MŪSU STĀDU AUDZĒTAVĀ AUDZĒTO AUGU **XLI vairumtirdzniecības cenrādis**. Mēs to izdodam jau gadiem ilgi, nemainīgi cenšoties nodrošināt, lai tajā prezentētais sortiments būtu ne tikai plašs, bet arī intriģējošs un daudzveidīgs. Šogad tajā atradīsiet vairāk nekā 200 jaunumu – gan augus, kas paredzēti dārziem, gan tādus, kas lieliski noderēs terasēm, balkoniem un publiskajiem apstādījumiem.

Viens no svarīgākajiem pagājušā gada jaunumiem bija skarainā hortenzija – *Hydrangea paniculata* GROUNDBREAKER BLUSH 'LC NO 21' ^{PBR}. Šī pasaulē pirmā tipiski klājošā hortenzija tika ļoti labi uzņemta tirgū, un izstādē "Zieleń to Życie" 2025. gadā tā ieguva bronzas medaļu Augu jaunumu konkursā, kā arī Žurnālistu atzinību.

Šajā sezonā mūsu piedāvājums paplašinās ar vēl divām GROUNDBREAKER sērijas šķirnēm: *Hydrangea paniculata* GROUNDBREAKER RUBY 'LC NO 27' ^{PBR} un *Hydrangea paniculata* GROUNDBREAKER GREY 'LC NO 24' ^{PBR}. Abām šķirnēm raksturīgs ļoti zems augums, un tās lieliski noder kā augsnes sedzēji. Tās ir īpaši noderīgas publisko apstādījumu stādījumos, taču ar panākumiem var tikt audzētas arī konteineros uz balkoniem un terasēm.

Vēl viens interesants jaunums ir *Salix candida* ICEBERG ALLEY 'Jefberg' ^{PBR} – efektīvs augsnes sedzējs, kas izceļas ar sudrabaini pelēku lapojumu un dekoratīviem pūpoliem. Šaurās, ar pūkām klātās lapas piešķir tam vēsu, gandrīz ledainu nokrāsu, kas lieliski kontrastē ar zaļumu un tumšākiem krūmiem dobēs. Pavasarī, vēl pirms pilnīgas lapu plaukšanas, uz dzinumiem parādās sudrabaini pūpoli ar sarkanām putekšnīcām, kurus labprāt apmeklē apputeksnētāji kukaiņi.

Uzmanības vērts ir arī *Cercis griffithii* (Grifita jūdas koks) BLUE LAGOON 'RAFMAR 1' ^{PBR}. Tā jaunajiem dzinumiem ir tumši sarkans krāsojums, kas izteikti kontrastē ar sirdsveida lapu vēso, sudrabaino toni. Šis oriģinālais krāsu salikums padara augu par efektīvu akcentu dārza kompozīcijās.

Cenrādī atradīsiet arī daudzas citas jaunas un interesantas sugas un šķirnes. Ceram, ka šī gada piedāvājums būs Jums iedvesmas avots un ļaus bagātināt veidotos stādījumus ar vērtīgiem, efektīviem un līdz šim stādu audzēšanā reti sastopamiem augiem.

Šajā sezonā gatavojam standus šādās izstādēs:

☞ **Zieleń to Życie**, Varšava,

2026. gada 3.–5. septembris

☞ **Gardenia**, Poznaņa,

2026. gada 6.–8. oktobris

☞ **Zielony ShowRoom**, Konstantinova Ludzka,

2026. gada 3.–5. novembris

☞ **IPM Essen**, Esene, Vācija,
